**China Aoyuan Property (3883 HK)**

More catalysts yet to be discovered; Upgrade to BUY

**We raise our TP to HKD1.77 (+HKD0.2 if dividend adjusted) to reflect NAV increase contributed by new projects acquired in 2014, and the confidence brought by Chairman's latest share purchases at avg cost of HKD1.55. We expect Aoyuan to achieve its 2014 full year pre-sales target of RMB15b, and future pre-sales growths are expected to remain high. Upgrade to BUY.**

→ **Tepid 1H14 but FY pre-sales target can be achieved:** Aoyuan's 1H14 results were a bit disappointing due to less completion/delivery. However the bright side is its pre-sales recorded robust growth of 38% YoY and we expect its full year target of RMB15b can be achieved.

→ **Still cautious in low-cost land-banking strategy:** Aoyuan has acquired 7 land parcels so far this year, all at very reasonable prices. As at mid-2014, avg land cost was only RMB1,105/sm for total 12msm land bank.

→ **Chairman shows confidence in Aoyuan's LT development:** In Jul, Aoyuan's Chairman Mr. Guo Zi Wen purchased 56.2m shares from secondary market at an avg cost of HKD1.55, showing that he is confident in the company's long-term development and the stock is undervalued.

→ **More catalysts for Aoyuan the market needs to see:** We see several macro/micro catalysts for Aoyuan to grow its stock price should reflect these catalysts incl.: new urbanization, policy easing, credit easing, product mix modification, diversification with various theme properties and exploring overseas opportunity to mitigate domestic reliance.

→ **Valuation:** The HKD1.77 TP is based on 50% discount to estimated NAV, suggesting 4.5x 14F P/E and 0.5x 14F P/B respectively. The stock is trading at 64% discount to NAV, implying 37% upside.

→ **Key risks:** Macro: weaker economy, weaker property demands. Micro: failure to control financial healthiness and execution inefficiency.

**Relative Performance**

## A tepid 1H14 but full year pre-sales target may be achieved

Aoyuan delivered tepid 1H14 results with revenue +24% YoY and core net profit -0.6% YoY. This will lead to slight miss of our original FY revenue forecast if delivery cannot catch up in 2H14 to account for ~70% of FY total. As 1H:2H revenue split has been stable at c. 4:6 for the past years, we therefore revised down our FY revenue forecast for 2014F.

### Interim results summary (RMBm)

	1H13	2H13	1H14	2H14F	1H14 YoY	2H14F YoY
Revenue	2,150	3,579	2,658	4,458	24%	25%
Gross profit	665	1,093	812	1,833	22%	68%
Operating profit	512	577	569	1,221	11%	112%

Source: Company, Fubon Securities (HK)

1H14 pre-sales +38% YoY to RMB5.15b and pre-sold GFA +16% YoY to 539ksm (ASP +19%). 1H pre-sales accounted for 34% of FY pre-sales target of RMB15b (1H13A: 37%).

1H14 pre-sales achievement ratio fell slightly 3pp from 37% (to actual full year figure) in 1H13, mgmt. is still upbeat on achieving 2014 FY pre-sales target of RMB15b by faster project launch (2H14 new launches available for sale: RMB13b). Applying a guided sale-through rate of 70% for new launches and 35% for leftovers, it is no easy task but we still expect the FY target can be achieved with 2H14 pre-sales ~RMB10bn.

### Half-year revenue pattern (RMBm)

### Half-year pre-sales pattern (RMBm)\*

Source: Company, Fubon Securities (HK) \* 2014F based on company target

Some may worry that as Home Purchase Restriction (HPR) phasing out in most cities, Aoyuan's advantage in commercial apartments (CA) may be compromised. In our view, CAs account for only c.10% of total sales and most of them are in Guangzhou where HPR is not expected to be lifted soon. And CAs are more of investment function rather than for long-term family use, let alone the prime locations of Aoyuan's CAs, therefore we don't see material negative impact at the moment.

## Sticking to low cost land-banking strategy with cautiousness

Aoyuan is now very prudent in land acquisition. As at mid-2014, Aoyuan's total land bank was **11.96msm**, with **avg cost of only RMB1,105/sm**. In 1H14, 5 parcels were acquired at an avg cost of RMB1,347/sm. And during 8M14, 7 parcels at an avg cost of RMB1,702/sm.

National land market (incl. Guangdong Province and Guangzhou City) has been weak since earlier this year. This is a **good opportunity for developers with healthy cash position to expand counter-cyclically at low costs**.

## Mgmt. increases long position with high confidence

During Jul 11-18, Aoyuan's Chairman Guo Zi Wen bought a total of 56.2m shares from secondary market at an **avg price of HKD1.55**. His stake in Aoyuan increased from 46.66% to 48.03% after the share purchase (and as at this moment).

Chairman's share purchase was a strong dose for Aoyuan's share price. This represented **Mr. Guo's high confidence in Aoyuan's long term development and indicated that he believes Aoyuan is undervalued.**

Chairman's share purchase from secondary market					
Date	No. of shrs bought (m)	Avg price/shr (HKD)	Share purchase cost (HKDm)	Stake in Aoyuan after share purchase %

## Catalyst! Catalyst! Catalyst!

### Macro catalysts

#### 1) Acceleration of the grand New Urbanization

New Urbanization pilot program is reported to launch soon with 62 pilot administrative regions incl. 2 provinces (省) and 2 counties (縣), the rest are cities (市) and towns (鎮). **Accelerated urbanization will definitely help developers focusing on affordable homes.** On Sep 3, Guangdong Province published draft for public review on New Urbanization Plan 2014-2020 (廣東省新型城鎮化規劃 (2014-2020 年) 公眾諮詢稿). The Plan advises to upgrade big towns to cities so that public service can be improved with more budgets. Guangdong (excl. Guangzhou) accounts for c.36% of Aoyuan's land bank and c.20% of its GAV, and **the province's aggressiveness in promoting urbanization may bring more opportunities for Guangdong-based developers such as Aoyuan.**

#### 2) Lifting Home Purchase Restriction and further policy easing

During the past months, most of the 40+ cities originally carrying out Home Purchase Restriction (HPR) have lifted the austerity measure. Now there are **only 6 cities left** (Beijing, Shanghai, Guangzhou, Shenzhen, Zhuhai, Sanya) still sticking to HPR. We have seen **some local govts launch various stimulus plans to promote property sales, and more will follow suite.**

#### 3) More lending for 1st home buyers at lower rates and further credit easing

In May 2014, the central bank urged commercial banks to put higher priority granting loans to 1st home buyers and offer favorable lending rates. Recently banks in Wenzhou City offer 10% lending rates discount to 1st home buyers. **We expect more cities to follow** but bigger discounts (~30%) are not likely anytime soon. Recently many local govts released a series of measures to **ease on Housing Provident Fund lending criteria, and require banks to lower down payment rate/lending rates or increase mortgage quota, and this trend is expected to become pervasive nationwide soon.**

### Micro catalysts

#### 1) Modification in product mix to adapt to policy and market changes

According to the strategy set in 2012, residential/commercial property sales are designed to account for 60%/40% of total. Of all commercial properties, 80% are sold and 20% are held as investment properties. But now **with HPR fading out**, Aoyuan will **modify its dual core model – increase % of residential and decrease % of commercial.** At the same time, Aoyuan will cut % of bigger commercial units and raise % of smaller ones to attract more buyers.

#### 2) Diversifications in complex property with focus on health/leisure themes

Aoyuan will **continue to focus on property development.** Aoyuan is a pioneer developing complex properties, especially with cultural, health, tourism and leisure themes. The company plans to explore more opportunities in these alternative property projects going forward, as well as enhancing property mgmt. services to better serve buyers.

#### 3) Exploring overseas opportunities to mitigate domestic systematic risk

Aoyuan is currently seeking to develop property projects in Sydney, Australia. This is not going to bring revenue immediately but shall **mitigate Aoyuan's dependence on domestic market**, let alone property is short of supply in Sydney.

## Financial summary

Revenue growth for 2014F may be slower than originally expected due to fewer completion and delivery, but we expect growth to pick up again in 2015-16F. Margin is expected to drop slightly due to competition, ASP cuts in 2H14 and product mix changes.

Key Income Statement Items (RMBm)						
	2011A	2012A	2013A	2014F	2015F	2016F

ROE looks quite attractive and the breakdown via DuPont Analysis shows the improvement is largely due to rise in asset turnover (revenue/total assets) and equity leverage (total assets/shareholders' equity).

## NAV summary

After taking Aoyuan's operating history/scale/current situation into account, and a WACC of 10%, we arrived at an estimated NAV of HKD3.54. By applying **50% discount to NAV**, we reached a **TP of HKD1.77**, suggesting 4.5x 14F P/E and 0.5x 14F P/B respectively.

## Valuation and risks

Aoyuan is trading at 64% discount to our NAV, implying **37% upside potential**. If Aoyuan can deliver better-than-expected and consistent performance going forward, lower NAV discount should be justified, providing further upside potential.

Alternatively, the stock's 3.27x 2014F P/E and 0.36x 2014F P/B are now near historical -1x standard deviation levels, suggesting need for mean reversion.

**Historical 52-wk forward P/E (based on core net profit)**

The analyst of this research report certifies that the view in this research report accurately expresses the personal view of the analyst.

The analyst also certifies that:

- (i) he/she does not serve as officer of and has no financial interest in connection with the listed corporation which is reviewed in this research report ; and
- (ii) his/her associate does not serve as an officer and has no financial interest in connection with the listed corporation which is reviewed in this research report .

The analyst also declares that neither the listed corporation which is reviewed nor any other person has provided or agreed to provided any compensation, benefit or interest to the analyst in relation to this research report

This disclosure is made under and pursuant to paragraph 16 of the “Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission”.

### **Disclaimer**

This report has been distributed by Fubon Securities (HK) Limited (“Fubon Securities”) in the conduct of Hong Kong regulated business. It is not intended for anyone other than the recipient and should not be distributed by the recipient to any other persons. This report is not intended for distribution to, or use by, any person or entity in United States, Canada, Australia or any jurisdiction or country where such distribution would be contrary to law or regulation. It may not be reproduced or further distributed in whole or in part except with prior written consent of Fubon Securities. This report does not constitute or form part of and shall not be construed as any offer for sale or subscription or solicitors or invitation of any offer to buy or subscribe for any securities.

The materials and data contained herein are for information only and, in any event, shall in no event be construed as an offer to sell or the solicitation of an offer to purchase or sell any securities in any jurisdiction. Investor may be prohibited from purchasing or selling the securities referred to herein. Fubon Securities does not make any representation, undertaking, warranty or guarantee as to the update, completeness, correctness, reliability or accuracy of the materials and data herein. All opinions, forecasts or estimation expressed herein are subject to change without prior notice. Fubon Securities and its parent and affiliates accepts no liability or responsibility whatsoever for any direct or consequential loss and/or damages arising out of or in relation to any use of opinions, forecasts, materials and data contained herein or otherwise arising in connection therewith. The opinions or forecasts herein are made without taking into account specific financial position, investment objective, investment experience or other need. It is, therefore, expected that investor shall not make investment decision in reliance on opinions, forecasts, materials and data herein without seeking independent and professional advice.

Fubon Securities is a subsidiary of Fubon Securities Co., Ltd which is part of the Fubon Financial Holdings Limited (collectively “Fubon Group”). Except as otherwise disclosed, Fubon Group has no interest in the securities of the companies discussed in this report or member companies within the same group of such companies as at the date of issuance of this report . The companies within the Fubon Group and/or their officers, directors and employees may have positions in and may trade for their own account in all or any of the securities or investments mentioned in this report . The companies within Fubon Group may have provided investment services (whether investment banking or non-investment banking related), may have underwritten, or may act as market maker in relation to these securities. Commission or other fees may be earned by Fubon Group in respect of the services provided by them relating to these securities or investments.

Except with Fubon Securities’ prior written consent, the opinions, forecasts, materials and data contained herein may not be copied, reproduced, distributed or published by any person for any purpose. The opinions, forecasts, materials and data herein are provided to the intended recipient only.

### **Risk**

The securities or investments referred to in this document may not be suitable for all investors. In particular, no consideration has been given to any particular investment objectives or experience, financial situation or other needs of any recipient. Accordingly, no representation or recommendation is made and Fubon Group accepts no liability with regard to the suitability or appropriateness of any of the securities and/or investments referred to herein for any particular person’s circumstances. Investors must make investment decisions in light of their own investment objectives, financial position and particular needs and where necessary consult their own professional advisers before making any investment. This report is not intended to provide any professional advice and should not be relied upon in that regard. The value of the investment may go up as well as down. Past performance is not indicative of futures performance. The risk disclosed herein is not intended to be an exhaustive list of risks associated with the investment. Investors should read and fully understand all the offering documents relating to such securities or investments and all the risk disclosure statements and risk warnings therein before making any investment decisions.

### **Fubon’s Rating System**

Rating	Definition
Buy	Expected absolute return to be over 30% within the next 6 months
Add	Expected absolute return to be 10 – 30% within the next 6 months
Neutral	Expected absolute return to be level within the next 6 months
Reduce	Expected absolute return to be negative 10 – 30% within the next 6 months
Sell	Expected absolute return to be over negative 30% within the next 6 months
Not rated (NR)	Pursuant to Fubon acting in deals involving the company or there is not a sufficient fundamental basis for determining an investment rating
Under Review	Fubon is in the process of determining an investment rating and will assign a rating within the 3 – to 6- month horizon
Sector Rating	Definition
Overweight	Sector expected to outperform the broader market indexes within the next 6-12 months
Market Weight	Sector expected to perform in line with the broader market averages within the next 6-12 months
Underweight	Sector expected to underperform the broader market indexes within the next 6-12 months
